Control Risks Announces New e-Discovery Offering in South Africa

RelativityOne enables Control Risks to manage large volumes of data and handle complex engagements for clients throughout Africa

15 DECEMBER 2022, JOHANNESBURG – Control Risks has announced it is expanding the firm's global e-discovery offering with the addition of Relativity's end-to-end SaaS product, RelativityOne, in South Africa and is partnering with Relativity to lead the launch of RelativityOne on the continent.

Control Risks uses RelativityOne in support of complex engagements for clients exposed to regulatory investigations, internal investigations and disputes, litigation and enforcement actions and, increasingly, in privacy, cyber and data analytics-driven engagements for clients enhancing their compliance frameworks. RelativityOne's scalability and flexibility allow Control Risks to handle any case, no matter the size, and offer a more consistent experience to customers around the world.

"We are extremely proud to be first among Relativity Gold Partners to launch RelativityOne in South Africa. Both here and across the world, our clients are grappling with the implications of today's high data volumes for complex, cross-border matters. Being able to offer world-class technology that supports data collection, processing, hosting and review within our own jurisdiction - without the international price tag – is a game changer," says Joyce Nkini-Iwisi, Africa Forensics Lead for Control Risks. "Since 2017, Control Risks South Africa has had on-premise Relativity with client data hosted in country. The launch of RelativityOne in South Africa will help us to serve clients better through cutting-edge technology that helps them manage the review of today's huge data volumes."

The SaaS product allows users to streamline their technology stack to help manage large volumes of complex, unstructured data and reduce risk with proactive threat prevention, automated security processes and leading compliance certifications. RelativityOne's rigorous security processes provide 24/7 cloud security to protect clients' data while it is being worked on, which is becoming increasingly important due to the rise of cyberattacks and data breaches.

"We are excited to partner with Control Risks on our endeavour to expand accessibility to RelativityOne worldwide. RelativityOne is available in South Africa at the perfect time as the platform can help customers adhere to the latest data policies and laws in the region," said Steve Couling, Managing Director and Vice President of Sales, EMEA at Relativity. "Now more than ever before, there is more pressure for companies to keep their data within South Africa

and to respond quickly to cyber breaches that may involve cross-border disclosures. RelativityOne allows Control Risks the speed and advanced tools to help their clients comply with such matters.”

About Control Risks

Control Risks is a specialist global risk consultancy that helps to create secure, compliant and resilient organisations in an age of ever-changing risk. Working across disciplines, technologies and geographies, everything we do is based on our belief that taking risks is essential to our clients’ success. We provide our clients with the insight to focus resources and ensure they are prepared to resolve the issues and crises that occur in any ambitious global organization. We go beyond problem-solving and provide the insights and intelligence needed to realize opportunities and grow. Control Risks provides RelativityOne in the United States, United Kingdom, Hong Kong, Germany, Brazil and Singapore. Visit us online at www.controlrisks.com.
