Control Risks Announces New e-Discovery Offering in Dubai

RelativityOne enables Control Risks to manage large volumes of data and handle complex engagements for clients throughout the Middle East and Africa

11 May 2022, DUBAI – Control Risks has announced it is expanding the firm's global e-discovery offering with the addition of Relativity's end-to-end SaaS product, RelativityOne, in Dubai.

Control Risks uses RelativityOne in support of complex engagements for clients exposed to regulatory investigations, internal investigations and disputes, litigation and enforcement actions and, increasingly, in data analytics-driven engagements for clients moving toward the next stages of compliance maturity. RelativityOne's scalability and flexibility allow Control Risks to handle any case, no matter the size, and offer a more consistent experience to customers around the world.

"We are delighted to add Dubai to our list of RelativityOne locations, which signals a clear step to expand our global capabilities in this field. As a RelativityOne Gold Partner in Dubai, we are in prime position to handle complex litigation, investigation, compliance and regulatory proceedings for our clients throughout the region," said Tom Griffin, Partner for Control Risks Middle East and Africa region. "This move will enable our clients to manage, structure and organise their data and act on it swiftly using a secure platform with the latest analytics capabilities and do so in a manner compliant with UAE's Data Protection Law."

RelativityOne is the most globally available e-discovery and investigations solution on the market.

The SaaS product allows users to streamline their technology stack to help manage large volumes of complex, unstructured data and reduce risk with proactive threat prevention, automated security processes and leading compliance certifications. RelativityOne's rigorous security processes provide 24/7 cloud security to protect clients' data while it is being worked on, which is becoming increasingly important due to the rise of cyberattacks and data breaches.

"We're excited to be able to offer RelativityOne capabilities to our clients in UAE," said Torsten Duwenhorst, Control Risks Partner for EMEA Data & Technology. "This is a sophisticated market for e-discovery, and the ability to manage large volumes of complex, unstructured data is critical. RelativityOne's ability to securely connect directly to client data in the cloud enables a streamlined approach to data acquisition and analysis. Furthermore, RelativityOne's capacity to manage and gather insights from an ever-expanding list of popular text, instant message, chat and collaboration data formats is vital – combining this technology with our disputes and investigative experts in Dubai will be impactful for our clients."

"It's a key priority for Relativity to ensure our customers can meet market demand and continue to grow globally with their respective clients," said Steve Couling, Managing Director and Vice President Sales, EMEA at Relativity. "It's clear this is also of utmost importance for Control Risks, as they've demonstrated how committed they are to expanding their presence in the cloud to flexibly support investigations, disputes and compliance needs wherever they arise across the globe. We look forward to continuing to support Control Risks in expanding their global footprint and helping their clients work seamlessly and securely around the world."

About Control Risks

Control Risks is a specialist global risk consultancy that helps to create secure, compliant and resilient organisations in an age of ever-changing risk. Working across disciplines, technologies and geographies, everything we do is based on our belief that taking risks is essential to our clients' success. We provide our clients with the insight to focus resources and ensure they are prepared to resolve the issues and crises that occur in any ambitious global organization. We go beyond problem-solving and provide the insights and intelligence needed to realize opportunities and grow. Control Risks provides RelativityOne in the United States, United Kingdom, Hong Kong, Singapore, Germany, Brazil and Singapore. Visit us online at www.controlrisks.com.

About Relativity

Relativity makes software to help users organize data, discover the truth and act on it. Its SaaS product RelativityOne manages large volumes of data and quickly identifies key issues during litigation and internal investigations. The AI-powered communication surveillance product, Relativity Trace proactively detects regulatory misconduct like insider trading, collusion and other non-compliant behavior. Relativity has more than 300,000 users in approximately 40 countries serving thousands of organizations globally primarily in legal, financial services and government sectors, including the U.S. Department of Justice and 198 of the Am Law 200. Relativity has been named one of Chicago's Top Workplaces by the Chicago Tribune for 10 consecutive years. Please contact Relativity at sales@relativity.com or visit http://www.relativity.com for more information.
